

Dear Jack and Jim,

I just got home from the Swedish class so I will write to you. Dad is reading the Swedish newspaper that a man in my class brings to me.

Probably you have heard from Gail now as she planned to write and tell you about the change in their plans. Anyway Garry will be getting the home after all and as I've loved the Wednesday Gail had prettily named but from her apartment where she had a telephone call from Garry that he would be arriving Wednesday so she had to carry everything back in again. They will be living in North Carolina after all so you will probably see them. Gail is really excited about it.

Last Friday we had the lunch con at Jackson to converse who was absent. No one knew so all of us went with a picnic shipped on post. Even little Helen came for a while. I don't

said "well the real important
mother please stand up." to Every
one stood up and I went over
and pinned a pair of buttons on
Sandra. Every one was surprised
as no one thought it would be
Sandra. They thought it was either
Mary or Lottie. There were some of
us plus some little children
Dick has been out of town and
when he come back from his
last trip he brought Sandra a
statue of "his son standing on
a platform and he as pointing his
finger out" and on the platform
or base is written - "Don't ever
forget to take your pill today"
Sandra brought it to his luncheon
to show us and every one had a
good time

We plan to go up to the cabin
this week and we haven't been
up for awhile. Jonie Carlson and
her girl friend were up there the
past week end.

Mary has gone back to work
but only for Mondays and Tuesdays.

He is taking a course at the
U. of W on Wednesday nights. It
is about the difference in people.
We haven't caught the mole
yet in our back yard all the
trap is set. The mole is
tearing up the whole yard.

I hope the summer there since
went off soon. It rained all day
today here but I stayed home
and studied. Adams and Agostini
are married.

I hope Uncle, you are getting
along fine in school.

We are really looking forward
to seeing you in November and
that isn't too far away now.

Love,

Wm.

P.S. I just saw in the paper
that the temperature there was
68° so that is much better.
